Using the bounty of the ocean and Earth to create beautiful hair

Quick coloring and damage repair

Faster coloring and more effective, more beautiful repair of damaged hair

Ocean & Earth Hair Color Treatment contains carefully selected natural ingredients from the ocean and Earth that are well suited to hair care, including jojoba oil, horse oil, black soybeans, humus extract, Rishiri kelp extract, sea silt, and squalane. This formulation eliminates difficulty in coloring, which has prompted dissatisfaction with hair color treatments in the past. Five types of nano-size ceramides and a micro-particle emulsion produced using micro-emulsification techniques help ensure that coloring agents and treatment ingredients are absorbed by the hair so they penetrate deeply. The resulting product colors hair faster and moisturizes damaged hair, making it an effective treatment for beautifying hair while giving it fullness and luster.

OCEAN & EARTH HAIR COLOR TREATMENT

(Contains hair cap & Vinyl Hand glove) NET.200g JPY 1,900

Ocean & Earth Hair Color Treatment gradually gives your hair more natural color over multiple applications. Please note that this product differs from typical store-bought hair dyes that are formulated to reliably color hair with a single application. You may experience difficulty obtaining the desired results depending on your hair type as this color treatment is designed to color hair gradually over multiple applications. In addition, because Ocean & Earth Hair Color Treatment is formulated using natural ingredients*, you may experience difficulty obtaining the desired results due to interactions with ingredients of other products in use, for example shampoo.

Bounty of the Ocean
Rishiri kelp extract, squalane, sea silt, fish collagen

Bounty of the Earth
Keratin (from wool), jojoba oil, horse oil, black soybeans, tealeaves, hyaluronic acid, humus extract, bentonite

SAKURA PREMIUM Face Wash

NET.100g JPY 1,800

Whitening effect every time you wash your face Leaves your skin moisturized

An extravagant compound of beauty ingredients including natural green tea extract, placenta, horse fat, co-enzyme Q10, vitamin C and collagen added to face soap containing Shirasu volcanic ash which has excellent adsorption qualities to wash away all impurities right to the bottom of the pores. Gently massage your face with the rich, dense foam. Impurities are washed away and the skin feels refreshed but lustrous and moisturized. Face wash with no added dyes or parabens-great for delicate skin.

*volcanic ash (Shirasu) = adsorption ingredient *No added dyes or parabens
*green tea extract, placenta, horse fat, co-enzyme Q10, vitamin C, collagen = moisturizing ingredients

The fine volcanic ash (Shirasu) particles reach right to the bottom of pores to remove impurities. With the power of adsorption of the volcanic ash (Shirasu), impurities from pores are caught and completely removed. Moisturizing ingredients such as horse fat, co-enzyme Q10 and collagen moisturize the skin after washing.

Monitoring test

Results from monitors replacing their usual face wash with "SAKURA PREMIUM Face Wash" for 1 week. Through everyday use, dullness and shine disappear and monitors

commented: "It's like the lustrous white skin of my youth has come back." "My face feels moisturized even after washing – it has great moisturizing capacity."
