Senile warts increase with age
Senile warts appear where skin is thin such as the face, neck, shoulders and chest, the weakening of the skin accelerates due to ultra-violet rays and one part of the ageing process is the overgrowth of skin and keratin. Recently there has been a sharp increase in the number of people who are bothered by these from their early twenties. In addition, these mostly contain melanin pigment and change to dark brown or black and feel rough with a variety of different forms ranging from flat to raised.

Reduce wrinkles sagging
Beauty lotion exclusively for the neck

It is possible to conceal wrinkles on the forehead or around the eyes and mouth with your hairstyle or make-up but the wrinkles at the bottom of your neck cannot be concealed. The area around your neck shows your age more easily than other parts of the body and no matter how young you try to look with your hairstyle or make-up, your neck can spoil it.... We recommend this premium essence to maintain beauty through care of the neck.
